

(www.kidney.org) there is an entire pediatric-specific track of social work programming (and we have a pediatric-only listserv for members, if anyone is interested). Here is what our members said about this:

www.tppp.net is a great website.

They have a brochure you can print out called "My Mom's Kidney is Named Lucy". I've used with for the children of new dialysis patients to read through.

- "[You and Your Kidneys with Sidney the Kidney](#)" booklet from the Ontario branch of the Kidney Foundation of Canada – this is a grade 5 level, so may be a little young for the 12 year old.
- "[Questions Children Ask: Helping Children Adjust When a Parent Has Kidney Failure](#)" from the National Kidney Foundation
- "[Moe's Sick Kidneys](#)" booklet from Kidney Health Australia. This one might be helpful for the 5-year-old.

Organ Transplants: What every Kid Needs to Know, UNOS
Understanding Growth in Kidney Disease, Genentech
Living with Dialysis: Getting the Most Out of Life, Life
Options Rehabilitation Program, Amgen
