To Whom It May Concern:

Re
D.O.B

Mrs. X is under my medical supervision. She has Chronic Kidney Disease as well as hypertension. She is on anti-hypertensives, however, I am recommending that she monitor her blood pressure on a daily basis to ensure very tight blood pressure control.

Controlling blood pressure is a primary method of delaying kidney failure, thus, it is extremely important that she purchase a blood pressure monitor for herself.

Please provide any assistance possible.

Should you have any questions, please contact Shirley Pulkkinen, renal social worker at 759-3434 ext. 4168.

Sincerely,

Dr. I.B. Pean
Clinical Director
Renal Program
